Right View

DETAIL A
SCALE 1:1

Shaded View

The top frame is designed with a CNC-machined lip, which allows for the insertion baseplate for jigs.

Piano Hinge

The left side of the top frame has to be seam-welded together with the piano hinge.

Description	Spacer Blocks(1)(2)(3): The purpose of spacer blocks is to support the top frame and hold the insert jig in place. Additionally, the spacer blocks aid in aligning the jigs and serve as the baseplate position for the jigs.

Description	Mounted Shaft Hinge-Repositioning the hinge to the underside of a cabinet.
Issue	P-101

Technical drawing of a cylindrical component. The drawing shows a side view of the cylinder with a central horizontal axis. The following dimensions and labels are present:

- Flange 1:** A label in red text pointing to the top flange of the cylinder.
- Flange 2:** A label in red text pointing to the bottom flange of the cylinder.
- 4XR $\frac{1}{16}$:** A label in a black box pointing to the top flange, indicating a 4x radius of 1/16 inch.
- 10:** A dimension line at the bottom indicating the length of the cylinder.
- 2 $\frac{1}{2}$:** A dimension line on the right indicating the diameter of the cylinder.
- $\frac{1}{2}$:** Two dimension lines at the top and bottom right corners, each indicating a distance of 1/2 inch from the edge to the centerline.

Technical drawing of a cabinet with a shelf and LED light. The drawing shows a side view of a cabinet with a shelf. Dimensions are given in inches: total width 12, shelf width 10, shelf depth $2\frac{1}{2}$, and cabinet height 10. The shelf has a thickness of $\frac{1}{2}$ inch. A detail view 'A' shows the shelf edge with a $7\frac{1}{4}$ inch depth. Labels include 'Shelf', 'LED Light', 'Endcaps 1&2', and 'DETAIL A SCALE 1:4'.

Technical drawing of a mechanical part with dimensions in fractions. The drawing shows a cross-section of a part with a central hole and a 45-degree chamfer. The dimensions are as follows:

- Overall width: $2\frac{1}{2}$
- Overall height: $2\frac{3}{8}$
- Top flange thickness: $\frac{1}{16}$
- Top flange width (left): $\frac{1}{16}$
- Top flange width (right): $\frac{1}{16}$
- Top flange width (far right): $\frac{1}{16}$
- Left side thickness: $\frac{15}{16}$
- Left side thickness (inner): $\frac{1}{16}$
- Left side thickness (outer): 1
- Right side thickness: $\frac{7}{8}$
- Right side thickness (inner): $.1$
- Internal hole diameter: $\frac{1}{8}$
- Chamfer angle: 45°

Technical drawing of a mechanical part with dimensions and a callout for the insert depth.

Dimensions shown:

- Overall length: $1\frac{1}{16}$
- Distance from left end to start of insert: $\frac{15}{16}$
- Insert length: $\frac{5}{8}$
- Distance from end of insert to center of hole: $\frac{1}{2}$
- Hole diameter: $\varnothing\frac{1}{4}$
- Overall width: $1\frac{1}{2}$
- Bottom thickness: $.1$

Callout: Depth of the Insert
